DOUBLE MOBILITY INSERT

The concept of double mobility with FIN CUPS SYSTEM, indicated for patients with high risk of dislocation or in case of revision of the insert in a well osseintegrated cup, consists in the use of a highly polished Cobalt Chromium Alloy (CrCO) insert, that articulates with a big polyethylene mobile insert (XLPE - High Cross Linked Polyethylene or XLPE+Vit E).

FIN CUPS

DOUBLE MOBILITY

28mm or 22.2mm femoral heads articulate with the polyethylene mobile insert, to create the second articulation.
